Green Screen

DESCRIPTION: **GREEN SCREEN** is a uniquely new urinal screen, formulated with a time-release enzyme to maximize odor control. The enzymes in **GREEN SCREEN** are continually released, constantly attacking the organic build-up in drains. These specially bred biocultures help keep drains flowing free, reducing blockages that cause overflows. They also help to digest the uratic acid crystals present on and in urinal surfaces, thereby helping to reduce the corresponding odors. **GREEN SCREEN** replaces foul urinal odors with a fresh scent, which lasts well over 30 days. **GREEN SCREEN** is constructed with high quality, recyclable plastic to maintain superior flexibility. **GREEN SCREEN** comes in mint, cotton blossom, and guava scents.

ADVANTAGES: 1) Reduces and eliminates odors from urinals. 2) Unique time released fragrance package, deodorizes 24 hours per day. 3) Releases specialized enzymes that clean the urinal, eliminate odors and help maintain drain flows. 4) Safe on all plumbing, each screen is **NON-TOXIC**, **NON-ACID** and **NON-CAUSTIC**. 5) The translucent flexible design allows full view of urinal drain to ensure optimal flow while also trapping debris. 6) Design helps reduce splash back, cutting cleaning time in half. 7) Made from 100% recyclable plastic. 8) VOC compliant in all 50 states.

AREAS OF USE: **GREEN SCREEN** is completely safe and may be used to help maintain urinals in any type of facility.

CAUTIONS: Avoid contact with eyes. If eye contact occurs, flush with water for 15 minutes while holding the upper and lower lids open. If irritation persists, see a doctor.

SPECIFICATIONS:

Classification	Enzyme screen
Color	Light green
Odor	Herbal mint
Flash point	> 200° F
Boiling point	N/A
Solubility in water	Insoluble
VOC	< 3%
