Lift Station Degreaser

DESCRIPTION: *LIFT STATION DEGREASER is a floating cleaner and degreaser that emulsifies and liquefies grease, sludge and raw sewage. The accumulation of sewage, grease, oils, fatty acids, calcium and soap scum forms deposits on wet well walls. LIFT STATION DEGREASER liquefies and attacks these build-ups so they float away, returning the station to optimum efficiency. LIFT STATION DEGREASER instantly deodorizes the well, leaving a pleasant citrus scent. LIFT STATION DEGREASER is biodegradable, non-freezing, contains no phosphates, no quaternary compounds or chlorinated solvents. It is also free from alkali and acids, and will not inhibit waste digestion when used as directed.*

ADVANTAGES: *1) Formulated to be a fast breaking emulsification system that possesses degreasing and detergent properties which clean the vertical surfaces of lift stations, wet wells and similar treatment facilities. 2) Added to a well in concentrated form for effortless cleaning and deodorizing. Cleaning is accomplished by the rise and fall of the water level. 3) Floats on top of water level providing an immediate seal to foul odors. Immediately replaces foul odors with a pleasant citrus scent. 4) Helps eliminate expensive plumbing and pump-out services.*

DIRECTIONS FOR USE: *Add LIFT STATION DEGREASER as is, do not dilute, directly to the wet well until a layer of 8 to 12 inches is floating on top of the surface. This initial treatment should last for approximately 3 to 6 months, depending on the system demands.*

CAUTIONS: *Avoid contact with eyes, skin and clothing. For eye contact, flush with water for 15 minutes while holding the upper and lower lids open. If irritation persists, see a doctor. For skin contact, wash affected area well with soap and water. If irritation persists, see a doctor.*

SPECIFICATIONS:

Classification	Liquid degreaser
Color	Orange
Odor	Citrus
Flash point	> 140* F (T.C.C.)
Solubility in water	Insoluble
pH	7.0 ~ 0.5
Biodegradability	100%

Certified 100% Women-Owned Small Business
