## Mud Away

**DESCRIPTION:** MUD AWAY is a concentrated liquid, intended to break-up and dissolve all types of organic and inorganic deposits that cloud up and collect in storm and sanitary sewers. MUD AWAY works on deposits of mud, silt, sand, sediment, sludge, leaves and clay so that they can be flushed through lines with normal water flow. Use of MUD AWAY will chemically break-up these clumps of hardened matter into a liquid mixture of light weight, small, fluffy particles that are easily flushed through lines. The effectiveness of MUD AWAY is not altered by water hardness or temperatures above the freezing point of water.

**ADVANTAGES:** 1) Highly concentrated formulation makes for very economical use factors, use at a rate of 1/2 to 1 gallon per 1000 gallons of flushing water. 2) Chemically removes mud, silt, sand, sediment, leaves, sludge and clay. 3) Safe in all drains, regardless of metal, concrete or PVC piping. 4) No odors are created by using this product. 5) May also be used in boilers and cooling towers.

**AREAS OF USE:** Municipalities, schools, hospitals, restaurants, apartments, day care centers, recreation areas, bus stations, airports, railway stations, nursing homes, hotels, motels, golf courses, cemeteries, and more.

**CAUTION:** Avoid contact with eyes. If contact occurs, flush with water for 15 minutes while holding the upper and lower lids open. If irritation persists, see a doctor.

### SPECIFICATIONS:

<b>Classification</b>	<b>Liquid dispersant</b>
<b>Color</b>	<b>Clear to hazy</b>
<b>Odor</b>	<b>None</b>
<b>Flash point</b>	<b>Non flammable</b>
<b>Boiling point</b>	<b>212* F</b>
<b>Solubility in water</b>	<b>100%</b>
<b>Biodegradability</b>	<b>100%</b>
