Air Care Covers

DESCRIPTION: AIR CARE is a unique way to handle malodors. The AIR CARE BASE is a battery operated motor driven fan that moves fragrances further than a typical passive system, thus freshening larger areas. The AIR CARE BASE releases approximately the same amount of air freshener daily over 30 days by automatically turning the fan sparingly in week 1 and gradually turning it more frequently until week 4 when the fan runs constantly. The natural fragranced COVER is impregnated with the fragrance, no liquids, aerosols or cartridges. AIR CARE BASE is the only air freshener dispenser that uses the COVER of the dispenser as the air freshener itself.

AIR CARE COVERS are available in cucumber melon, guava pineapple, mango and ocean mist and spiced apple.

ADVANTAGES: 1) The AIR CARE COVER contains 2-3 times more fragrance than gels or metered aerosols. 2) Freshens consistently for 30 days. 2) The AIR CARE BASE reminds you when to service it through 3 prompts; green blinking LED means it's good, red flashing LED means it's time to replace the COVER, and no light means it needs a battery. 3) Can't spill or misfire, completely safe for all facilities. 4) Each COVER is packed with a replacement battery. 5) Both the BASE and the COVER are made of 100% recyclable plastic. 6) Contains NO OZONE DEPLETING ingredients, and is VOC compliant in all 50 states.

AREAS OF USE: Restrooms, hospitals, nursing homes, rehabilitation centers, apartments, restaurants, hotels, schools, day care centers, offices, health clubs, locker rooms, animal clinics, conference rooms and anywhere else malodors exist.

SPECIFICATIONS:

Classification	Deodorizer
Color	white
Odor	Various (see above)
Flash point	> 200°F
Solubility in water	Insoluble
VOC	0%
Recyclable	100%
