Defoam

DESCRIPTION: DEFOAM is a milky white, liquid silicone emulsion, primarily blended for use in controlling foam in carpet cleaning applications. DEFOAM is formulated for a quick, immediate knockdown of foam in the reclaim tank of soil extractor equipment. DEFOAM is a stable emulsion that can be diluted without concern of separation in the tank. DEFOAM has excellent dispersability which helps to knock down foam quickly. DEFOAM is also designed to spread itself out over the entire solution which eliminates foam from the entire tank. DEFOAM is an aqueous based solution and works well in all water based systems for controlling excessive foam. DEFOAM may be used diluted in the system to control foam, or as a surface spray to knockdown existing foam buildup.

ADVANTAGES: 1) Compounded for quick dispersability and spreadability in all aqueous based solutions. 2) Works in 2 ways to control foam, either diluted in solution to prevent foam, or as a surface spray to eliminate existing foam. 3) Completely safe to use, will not affect the cleaning ability of the solutions it is added to. 4) Biodegradable, non-flammable and non-toxic. 5) Provides immediate results, and remains active in solutions long after adding.

AREA OF USE: Add DEFOAM before foam starts to build, as less product is needed to prevent foam than to destroy existing foam. For knocking down existing foam, spray over foam buildup.

SPECIFICATIONS:

Classification	Liquid silicone emulsion
Color	Milky white
Odor	Mild
Flash point	None
Boiling point	212° F
Biodegradability	100%

Certified 100% Women-Owned Small Business

Dedicated to Integrity • Reliability • Quality Products • Friendly Service

Our Products are Made in the USA and we Proudly Support Veteran Endowments
