

Fast Patch

DESCRIPTION: FAST PATCH is a fast setting concrete patch designed for permanent repairs. FAST PATCH is specially formulated for making structural repairs to horizontal, vertical and overhead surfaces. FAST PATCH is an all weather product that can be applied in below freezing temperatures (warm water should be used). FAST PATCH has been formulated with special concrete adhesion additives, enabling FAST PATCH to bond extremely well to existing concrete (with proper preparation). FAST PATCH can be used anywhere that rapid setting is necessary. FAST PATCH is the quick, easy and effective way to patch concrete.

ADVANTAGES: 1) Minimal preparation is required, simply clean and etch with CON CLEAN. 2) Initial set is 10 minutes, final set for light vehicle and foot traffic in 20 minutes. Full cure in 48 hours. 3) Easy to use, just add 1 part water to 6 parts patch. 4) A 40 pound pail covers about 50 square feet @ 1/8" thickness. 5) Tougher and longer lasting than ordinary concrete. 6) Will not shrink after it cures. 7) Can be trimmed and shaped. 8) Works equally well indoors and outdoors.

AREAS OF USE: Repair floors, steps, driveways, ramps, truck docks, sidewalks, bridges, tunnels, curbs, concrete pipes, sewers, culverts, retaining walls, cold storage vaults, freezers, catch basins, septic tanks and more.

SPECIFICATIONS:

Classification	Powder concrete patch
Color	Light gray
Odor	None
Solubility in water	Slight
