

Green Steel CSP

DESCRIPTION: GREEN STEEL CSP is a unique, revolutionary new product that is completely biodegradable, non-toxic, non-hazardous, safe to the environment, and works exceptionally well. GREEN STEEL CSP is a uniquely compounded oil-based formula that safely cleans stainless steel, then buffs to a dry film that protects the surface. This protective film resists further fingerprinting and smudges, eliminating the need for daily cleaning. GREEN STEEL CSP is non-abrasive and non-acid, and is safe to use on all grades of stainless steel. GREEN STEEL CSP dries streak free, leaving the surface cleaned, shined and protected. Use GREEN STEEL CSP, the all-natural solution to cleaning all stainless steel surfaces.

ADVANTAGES: 1) Safely cleans, shines and protects in one application. 2) Easy to use, simply apply with a soft non-abrasive cloth and wipe until clean. Turn cloth over and buff to a dry protective film. 3) Safe on all grades of stainless steel. 4) May be used indoors and outdoors. 5) Regular use will maintain and highlight the original luster of the steel. 6) Certified by the E.P.A. as DFE (Designed for the Environment).

AREAS OF USE: Refrigerators, freezers, ovens, stoves, barbeques, grills, hoods, dishwashers, washroom fixtures, restaurant equipment, drinking fountains, elevator doors, towel holders, hand rails, laundries and more.

SPECIFICATIONS:
