## Old Rusty A

**DESCRIPTION:** OLD RUSTY solves and eliminates the problems associated with rust. OLD RUSTY is a synthetic, water based resin emulsion product that chemically eliminates rust by converting it into a ready to go primer coat. OLD RUSTY reacts chemically with rust to form an iron complex, while simultaneously forming a polymer coating that helps prevent further rusting. OLD RUSTY is easy to apply and converts rust into a protective black primer coating that can be left as is, or painted over with the appropriate topcoat.

**ADVANTAGES:** 1) Easy to use. Wire brush any loose or flaky rust from the surface, remove any oils or grease. Simply spray OLD RUSTY "A" on the surface. 2) OLD RUSTY is water-soluble. All tools used in application are easily cleaned with soap and water. 3) Chemically converts rust, leaving a primed surface in one simple operation. 4) Effective even on damp rusty metals. 5) Leaves a durable primer coat ready for painting over, after full chemical cure time of 6 hours 6) Safe on virtually all metal surfaces.

**AREAS OF USE:** OLD RUSTY is an all purpose rust converter designed for all areas where rust is a problem. Especially useful in chemical and salt water environments, such as oil and chemical refineries, steel mills and marine applications.
