Vanilla-Killa

DESCRIPTION: Without a doubt, VANILLA-KILLA is the first insecticide you'll be happy to use. VANILLA-KILLA, as the name suggests, is a vanilla scented insecticide that leaves a pleasant vanilla aroma with no lingering harsh chemical odors. Don't let this pleasant scent fool you, as VANILLA-KILLA has a powerful effect on crawling insects. Formulated with Tetramethrin, VANILLA-KILLA drops bugs in their tracks. It also contains Permethrin which establishes an invisible barrier that keeps bugs from coming back. This potent combination enables VANILLA-KILLA to create an insect defense system that lasts up to 3 months after only one application.

ADVANTAGES: 1) Provides immediate kill on contact. 2) Leaves long lasting residual action, for up to 3 months. 3) No harsh odors when sprayed, leaving a pleasant vanilla fragrance. 4) Kills a wide variety of insects and pests, including but not limited to cockroaches, ants, spiders, booklice, boxelder bugs, centipedes, millipedes, earwigs, ground beetles, carpet beetles, crickets, dermestids, firebrats, fleas, falmetto bugs, silverfish, pillbugs, sowbugs, scorpions, ticks, waterbugs and more. 5) Superior tratment for baseboards, window and door frames, corners, pipes, storage localities, attics, crawlspaces and wherever insects are. 6) Directed stream penetrates and concentrates product where you want it to go.

AREAS OF USE: Homes, apartments, condominiums, warehouses, schools, office buildings, hospitals, retirement facilities, institutions, industrial plants, restaurants, hotels, motels, golf courses, municipalities, utility companies, churches and more.

SPECIFICATIONS:
