Wrap It Up

DESCRIPTION: WRAP IT UP is an easy to apply, self adhesive foam tape. WRAP IT UP provides a single layer insulation value of J.26 (K factor), about 40% more than cork tape. WRAP IT UP stops sweating on cold pipes used in refrigeration, freezer and air conditioner systems. WRAP IT UP forms a long lasting bond with clean metal surfaces, will not shrink, dry out or pull away when properly applied. WRAP IT UP may be applied to clean metal, rubber, glass, plastic (PVC) and painted surfaces. WRAP IT UP is made with expanded, closed cell elastomeric material (the million tiny cells contain an inert gas). The tape will not corrode copper and other materials. WRAP IT UP may be used in applications with a temperature range of -20° F to 180° F. WRAP IT UP resists oils, acids, alkalis, most solvents, water and water vapor, vermin, fungus and freeze-thaw cycles. It may be painted over with most standard paints. WRAP IT UP is self extinguishing and most importantly, environmentally friendly.

ADVANTAGES: 1) Self adhesive is easy to apply. 2) Won't harden, crack, shrink, dry out or pull away. 3) May be painted over for aesthetics. 4) Chemically resistant to most chemicals and fuels, including most solvents, acids, alkalis and water. 4) One wrap is all that is needed.

PACKAGING: Each roll is 2 inches wide by 1/8 inch thick by 30 feet long.

AREAS OF USE: Apply to clean metal, rubber, glass, plastic (PVC) and painted surfaces to protect from the elements, insulate and prevent condensation.

SPECIFICATION:

| | |
|----------------------------|--------------------------------|
| Classification | Insulating tape |
| Color | Black |
| Odor | None |
| Flash point | > 435° F (component) |
| Boiling point | > 400° F (component) |
| Solubility in water | N/A |
