Aero Grease

DESCRIPTION: AERO GREASE is an all weather, heavy duty, multi-purpose penetrating lubricant packed in a convenient to use aerosol can. AERO GREASE sprays out of the can as a thin, penetrating liquid that quickly sets into a thick red grease, which is capable of clinging to vertical surfaces. AERO GREASE contains special additives to provide superior adhesive, cohesive, extreme pressure and cushioning properties. AERO GREASE penetrates, lubricates and prevents rust and oxidation, and yet contains no ozone depleting chlorinated solvents.

ADVANTAGES: 1) The penetrating liquid reaches hard to lubricate areas before curing to a grease. 2) Cures to a heavy duty, extreme pressure lithium grease. 3) Special additives keep grease where needed, resisting "throw off". 4) Withstands heat up to 500° F. 5) Contains no chlorinated or fluorinated solvents. 6) Cleans and lubricates in one application.

AREAS OF USE: All mechanical and maintenance applications. Recommended for use on wire ropes, open gears, linkages, draglines, hinges, fittings, winches, cranes, cams, valves, cables, hoists, pulleys, rollers and anywhere else an exterior grease may be required.

SPECIFICATIONS:

Classification	Aerosol lubricant
Color	Red
Odor	Characteristic solvent
Flammability	Extremely flammable spray
Spray pattern	Directed mist
Solubility in water	Not Available

Certified 100% Women-Owned Small Business
