Good Grip

DESCRIPTION: GOOD GRIP is a slip resistant, epoxy coating that cures to a hard, flat, textured finish. GOOD GRIP is the ideal coating for most interior and/or exterior applications. GOOD GRIP provides just the right amount of traction that is needed, without any unsightly build up of chips or sand. GOOD GRIP's traction grabbing grit even helps prevent slipping when the surface is wet. GOOD GRIP dries quickly, and is suitable for use on most surfaces.

Available in yellow, black, or clear.

ADVANTAGES: 1) Convenient aerosol applicator. 2) Minimal amount of preparation required. 3) Light grit coating gives only the necessary traction. 4) Adheres to fiberglass, wood, steel, concrete, aluminum and most other surfaces. 5) Available in OSHA yellow, black, and clear. 6) Quick drying allows for very little down time. 7) Easy clean up with soap and water when job is done. 8) Adheres to oil and waterbased primers.

AREAS OF USE: Steps, ramps, loading docks, ladders, running boards, showers, bathtubs, around machinery, patios, concrete, pavement around a pool, boats, boat trailers, laundry rooms, walkways, garages, kitchens, malls, around fountains, hand rails, or anywhere slippery conditions exist.

Industrial Products

The Professionals' Choice!

SPECIFICATIONS:

Classification	Aerosol
Color	Varies
Odor	Solvent
Flash point (concentrate)	45°F T.O.C.
Flammability	Extremely flammable spray
Spray pattern	Mist
Propellant	Liquified petroleum gas
