Odor Digester Sponge

DESCRIPTION: ODOR DIGESTER SPONGE is a solid, paste-gel containing activated charcoal, humectant and reagents which absorb, neutralize or alter undesirable odors and fumes. ODOR DIGESTER SPONGE is designed for continuous use, is non-toxic, non-flammable, environmentally safe and easy to use. As the ODOR DIGESTER SPONGE evaporates it neutralizes the odor by changing the chemistry of organically or chemically generated odors. The molecules of the ODOR DIGESTER SPONGE SPONGE when air borne, have the ability to chemically change, absorb and encapsulate the molecules of the bad odor. The name ODOR DIGESTER SPONGE implies that the odors are absorbed into the material of the container, whereas in actuality the action is outward when the sponge material is air borne. The ODOR DIGESTER SPONGE is not a masker, rather it is a true neutralizer. The ODOR DIGESTER SPONGE can be placed in air handling equipment to absorb and neutralize odors as product is circulated throughout the entire building.

Regular is 1/2 lb, Large is 1 lb.

ADVANTAGES: 1) Freshens stale air with activated charcoal. 2) Does not mask odors, but rather removes odors from the air completely. 3) No sprays, so no messy fallout or staining.

AREAS OF USE: Freshening meeting rooms, offices, hospitals, nursing homes, schools, day care facilities, veterinary clinics, sports clubs, bathrooms, restaurants, and more.

SPECIFICATIONS:

Classification	Solid paste
Color	Blue/Green
Flash Point	>220° F
Odor	Charcoal
Solubility in water	Partial
