

## Soy Release

**DESCRIPTION:** SOY RELEASE is an earth friendly, non-petroleum asphalt release agent. SOY RELEASE is a complex blend of methyl soyate (an all natural soybean oil ester), designed to replace diesel and/or kerosene as a release agent. The esters will not allow asphalt to stick to them, hence protecting whatever surface they are applied to. SOY RELEASE provides all the benefits of petroleum based release agents, and has no negative environmental impact. SOY RELEASE is excellent for use on all asphalt applications, and may be applied to truck beds, wands, chains, conveyors, rollers, dip buckets and shovels. Always apply SOY RELEASE before starting a job, and minimize the clean-up at the end of the job. SOY RELEASE does the job, for you the user and for the planet.

**ADVANTAGES:** 1) Prevents asphalt from sticking to truck beds, forms, tools, rollers and patching machines. 2) Ready to use formula 3) Safe for personnel and equipment. 4) Great for truck beds, tailgates, shovels and other equipment. 5) Provides easy separation of asphalt from beds of dump trucks and haul trucks.

**AREAS OF USE:** Any place where asphalt is being used, such as construction, grounds maintenance, street departments, road repair equipment, slurry seal companies, paving companies, roofers, airports, municipalities, government agencies and more.

### SPECIFICATIONS:

<b>Classification</b>	<b>Soy release agent</b>
<b>Appearance</b>	<b>Clear to amber liquid</b>
<b>Odor</b>	<b>Slight citrus</b>
<b>Flash point</b>	<b>212° F (CCC)</b>
<b>Solubility in water</b>	<b>Non soluble</b>
<b>Boiling point</b>	<b>365° F</b>
<b>VOC</b>	<b>&lt; 2%</b>
<b>Biodegradability</b>	<b>100%</b>
