Chill Out

DESCRIPTION: CHILL OUT combines rapid freezing action with an advanced rust dissolving formula so that seized or rusted parts are easily released. Sprayed areas shrink and create openings to allow the lubricant to penetrate and open up the toughest bonds. Ideal for use in the most demanding penetrating lubricant applications including rusted manifold bolts, exhaust flanges, industrial and construction bolts and screws or other outdoor exposed equipment. CHILL OUT contains NO chlorinated solvents or ozone depleters and is nonconductive to 33,000 volts for use around live equipment. The 360° spray valve allows for use in any position and for access to hard-to-reach areas while the large pad actuator prevents freezing of fingertips. CHILL OUT is a low VOC content product.

ADVANTAGES: 1) Superior penetrating qualities quickly frees old, corroded and frozen parts. 2) Residual lubrication continues long after oils wear off. 3) Fortified with Teflon* to provide excellent pressure resistance. 4) Provides long lasting corrosion protection. 5) Contains no chlorinated solvents and low V.O.C.'s.

AREAS OF USE: Auto mechanics, utility companies, marine repair, industrial plants, refineries, heavy equipment companies, railroads, construction, forklift repair shops, golf courses, and anywhere a penetrant/lubricant is required.

SPECIFICATIONS:

Classification	Aerosol lubricant
Color	Clear
Odor	Characteristic solvent
Flash Point	>60°F
Spray pattern	Powerful stream
Solubility in water	<1%
