

Urinal Blocks

DESCRIPTION: URINAL BLOCKS are uniquely designed cages that contain the urinal block providing a continual cleaning solution that leave the surrounding area smelling fresh. URINAL BLOCKS release the cleaner, deodorizer and fragrance as the urinal is flushed. URINAL BLOCKS contain enzyme producing, odor-eating biocultures that digest organic material and waste, keeping the drains running freely. URINAL BLOCKS fit most urinals and deodorize up to 1500 flushes (30 days normal operation). The compound inside gradually dissolves, as it imparts a nice fragrance. Blocks are acid-free, water-soluble and 100% biodegradable.

ADVANTAGES: 1) Helps control and eliminate odors that build up in urinals. 2) Provides continuous released cleaning and freshness. 3) Contains cleaner, descaler and water softeners. 4) Deodorizes with every flush. 5) Loaded with enzyme producing bacteria for drain maintenance. 6) Completely biodegradable. 7) Contains NO paradichlorobenzene.

AREAS OF USE: Restrooms everywhere, maintenance shops, hotes, rest stops, offices, hospitals, schools, day-care centers, etc.

SPECIFICATIONS:

Classification	Solid block
Color	Blue
Odor	Fresh
Flash point	Non flammable
Solubility in water	100%
Biodegradability	100%
