Diesel Stabilizer

DESCRIPTION: DIESEL STABILIZER is an unparalleled fuel conditioner that responds to an entirely new set of demands created by low sulfur fuels, as well as satisfying the needs of previous fuel related problems. DIESEL STABILIZER not only helps to stabilize the fuel, but also increases engine life and power, by keeping the internal parts of the engine cleaner, aiding combustion, neutralizing acids and holding carbon, varnish and gum in suspension. This suppresses the tendencies of icing and corrosion. For untreated engines use 1 quart per 50 gallons of fuel, and for continued treatment use 1 quart per 200 gallons of fuel. For use in storage tanks add 1 quart per 500 gallons.

ADVANTAGES: 1) Prevents slime build-up. 2) Keeps injections running clear. 3) Reduces fuel consumption. 4) Prolongs pump and injector life. 5) Neutralizes harmful engine acids. 6) Increases horsepower output. 7) Provides lubricity for low sulfur fuel.

AREAS OF USE: Trucking, heavy construction, agriculture, mining equipment, industrial equipment, marine and fuel storage applications.

SPECIFICATIONS:

Classification	Liquid
Color	Clear Amber
Odor	Characteristic
Flash Point	212°F
Evaporation Rate	Slow
