

Fast Copper

DESCRIPTION: FAST COPPER is a hand-mixable, fast-setting, copper-reinforced epoxy putty that quickly repairs pipes, tanks and vessels made of copper, brass, bronze and other non-ferrous metals. After mixing, it forms a polymer compound that is extremely tough and durable and offers exceptional adhesion. Each handy stick contains pre-measured portions of activator and base throughout — no measuring or mixing tools are necessary. The consistency (like modeling clay) eliminates drips and runs, facilitates adhesion to the substrate, and allows the material to be shaped as needed before curing begins. After 60 minutes the application can be drilled, sawed, sanded, and painted. Once cured FAST COPPER has the same appearance and texture of metal. Suitable for interior or exterior use, it is resistant to water, chemicals, and temperature extremes. It contains no VOCs or solvents. It's non-flammable and releases no noxious fumes. It won't shrink or pull away. The unused portion stays fresh for future use. It also bonds to wood, glass, masonry and many plastics. Belongs in every toolbox!

ADVANTAGES: 1) Water pipes and vessels can be restored to service after 1 hour. 2) Repair freeze breaks, leaking water lines and other plumbing problems in 15 minutes 3) Seals copper gutters and downspouts, leaky pipes, elbows, joints, etc. 4) Bonds to damp, wet, slow-leaking surfaces.

AREAS OF USE: All mechanical and maintenance applications. Cities, counties, large buildings, apartment complexes, hospitals, care facilities, shopping malls and more.

SPECIFICATIONS:

Classification	Solid
Color	Metallic, beige
Odor	Pungent, sulfurous
Flammability	N/A
Solubility in water	Insoluble
