Ivy Block

DESCRIPTION: IVY BLOCK is a pre-contact skin solution that acts as an invisible barrier to help protect against outdoor irritants. Dries quickly and is non-greasy, sticky or chalky, which maybe found in other products. There is also no wait time, simply apply IVY BLOCK to exposed skin and immediately start your outdoor task. IVY BLOCK is almost unnoticeable on the skin and washes off easily with soap and water. Help to reduce loss of work due to rash from Poison Ivy, Poison Oak and/or Poison Sumac. Available in gel and pre-moistened wipes.

ADVANTAGES: 1) Pre-Contact barrier dries quickly without being greasy or sticky and washes off with soap and water. 2) Guards against poison ivy, oak and sumac. 3) Easy-to-apply gel, apply just like sunscreen to all exposed skin. 4) FDA-approved.

AREAS OF USE: Outdoor workers such as landscapers, parks and recreation personnel, forestry workers, city and county personnel, fire protection and more.
