Tef-Pen #2

DESCRIPTION: TEF-PEN #2 is a super penetrant, fortified with Teflon* for lubrication and molybdenum disulfide for superior corrosion protection. TEF-PEN #2 has been formulated to rapidly penetrate through rust and corrosion, and leave a long lasting residual lubricant. TEF-PEN #2 dramatically reduces friction and wear, the greater the friction the more lasting the lubrication. TEF-PEN #2 dispenses a thin coat of Teflon* to ensure long lasting lubrication, and moly for long term protection. TEF-PEN #2 works well in an extremely wide temperature ranges, from -50° F to +450° F. TEF-PEN #2 penetrates, protects and lubricates.

ADVANTAGES: 1) Superior penetrating qualities quickly frees old, corroded and frozen parts. 2) Residual lubrication continues long after oils wear off. 3) Fortified with Teflon* to provide excellent pressure resistance. 4) Provides long lasting corrosion protection. 5) Contains no chlorinated solvents and low V.O.C.'s. 6) Authorized for use by the U.S.D.A.

AREAS OF USE: Mechanics, utility companies, marine repair, industrial plants, refineries, food and bottling plants, heavy equipment, railroads, construction, forklift repair shops, golf courses, hotels and anywhere a penetrating lubricant is required.

SPECIFICATIONS:

Classification	Aerosol
Color	Dark brown
Odor	Solvent
Flash point (concentrate)	40° F (T.O.C.)
Flammability	Extremely flammable spray
Propellant	Carbon dioxide
Solubility in water	Slight

Certified 100% Women-Owned Small Business

Dedicated to Integrity • Reliability • Quality Products • Friendly Service

Our Products are Made in the USA and we Proudly Support Veteran Endowments
