Ultra 23

DESCRIPTION: *ULTRA 23 is a scientifically formulated, state-of-the-art thermoplastic acrylic finish that brings floor care into the 21st century. This new system drastically reduces labor costs by providing floors with a smooth, hard, crystal clear surface that requires no pre-sealing or buffing to maintain its gloss. It responds, however, to burnishing with high speed (200 rpm) and ultra high speed (2000 rpm) machines. ULTRA 23 resists black heel marks and scuffing. And, because it uses metal cross linked polymers, it also withstands months of wear and washing without losing its luster. ULTRA 23 mops on easy and smooth and covers between 1200 and 2000 square feet per gallon. It is self-leveling, non-streaking and will not puddle, yellow or powder.*

ADVANTAGES: *1) Easy to use. 2) Resists marks and scuffs. 3) Long lasting durability and shine. 4) No time consuming maintenance to maintain its beauty.*

Areas of Use: *High traffic flooring made of rubber, quarry, vinyl, vinyl asbestos, resilient floor tile, sealed wood, linoleum, concrete, marble, and terrazzo.*

SPECIFICATIONS:

Classification	Liquid
Color	Opaque white liquid
Odor	Bland odor
Flash point	NE
Boiling point	> 212° F
Solubility in water	100%
