Fight Back GRAFFITI PROTECTOR

DESCRIPTION: *FIGHT BACK* is a permanent, non-sacrificial, clear coating that revolutionizes graffiti removal. *FIGHT BACK* is a non-stick coating which when cured won't allow graffiti to bond to it, thereby allowing for the easiest graffiti removal possible. *FIGHT BACK* won't allow paints, permanent markers, decals, chewing gum or any other form of graffiti to stick to it. No more shadows left behind, regardless of the surface. After curing, *FIGHT BACK* is unaffected by the graffiti removal process, giving long-term graffiti protection. *FIGHT BACK* is UV stable, completely clear, adheres to virtually all surfaces (porous or non-porous) and has a quick cure time. Once cured, *FIGHT BACK* allows for expansion and contraction, building movement and temperature extremes. After curing, graffiti removal is simple. Remove most graffiti with *NEXGEN DETAIL SPONGE*. Simply moisten the sponge and wipe the graffiti off. If necessary, *Graffiti Gone Wipes* or *OFF-A PLUS* may be used without damaging the coating.

ADVANTAGES: 1) A permanent coating that prevents graffiti, stickers and decals from adhering to it. 2) Completely clear with a high concentration of UV protection, provides years of protection. 3) Safe on virtually all surfaces, indoors or outdoors, porous or non-porous, painted or non-painted. 4) AQMD and CARB compliant.

AREAS OF USE: Excellent for use on bathroom partitions, walls, lockers, signs, concrete (sealed or unsealed), cinder block, brick, wood, tile, porcelain, ceramic, metal, plastics, wood, playground equipment, construction equipment and virtually any other surface.

SPECIFICATIONS:

Classification:	Aerosol
Flash point (concentrate):	45° F
Color:	Clear
Flammability:	Extremely flammable
Odor:	Solvent
Spray pattern:	Broad coverage
VOC	85 gpl
