Spray-A-Jell

DESCRIPTION: *SPRAY-A-JELL is truly a break through in an innovative, long lasting air freshener. SPRAY A JELL provides long lasting air freshening results, similar to the benefits of fan cabinets and gel cups, without the cost, maintenance or risk of vandalism. SPRAY-A-JELL is ideal for use in high traffic areas where a long lasting fragrance is desirable. Spray in an area early in the morning and still have excellent air freshening late in the day, or even the next couple of days, depending on the size of the area being treated. Traditional air freshening sprays are thin and float with the air. As air flow carries them away, so goes the air freshener. Not SPRAY-A-JELL, the jelled fragrance slowly evaporates, producing a long lasting, pleasant fragrance that really lasts. SPRAY-A-JELL is available in Cherry scent.*

ADVANTAGES: 1) Jelled fragrance slowly evaporates, producing a long lasting scent. 2) Contains NO OZONE DEPLETING substances. 3) Chemically neutralizes malodors with industrial and/or institutional strength. 4) Quickly masks and neutralizes odors caused by smoke, decay, urine, feces, vomit, cooking, and much more. 5) Long lasting results.

AREAS OF USE: *Freshening auto interiors, closets, showers, garbage receptacles, restaurants, hospitals, apartments, hotels, schools, day care centers, laundry hampers, conference rooms, offices, nursing homes and anywhere else odors exist.*

SPECIFICATIONS:
