Lube All Red

DESCRIPTION: LUBE ALL RED is an all-purpose, non-melt grease, formulated with extreme pressure and anti-wear additives. LUBE ALL RED has excellent adhesive and cohesive properties. LUBE ALL RED protects equipment indoors or outdoors, even under high temperatures and heavy loads. Bentone based formula does not liquify at high temperatures like soap based greases, yet remains pumpable at low temperatures. LUBE ALL RED is compounded with special corrosion and rust inhibitors. LUBE ALL RED seals out dust and dirt contaminants, prolonging the life of metal parts. LUBE ALL RED gives an extra cushioning effect that reduces shock and noise. LUBE ALL RED is a long lasting product that replaces many commercially available types of grease.

ADVANTAGES: 1) Exceptional resistance to acids, water, salt spray, weather, dirt, dust, steam and oxidation. 2) Performs at a wide range of temperatures, up to 300°F. 3) Excellent load carrying capability, up to 60-70 Timken load. 4) High shock and impact grease, will not pound out or thin out. 5) Formulated with specialized rust and corrosion inhibitors to provide an extra level of oxidation protection.

AREAS OF USE: Trucking chassis and wheels, construction, agricultural and industrial equipment, bearings, disc brakes, truck & bus lubrication, and multiple industrial applications.

SPECIFICATIONS:

Color	Red
NLGI Grade	3
Drop point (ASTM D-556)	Non-melt
Timken OK Load	60-70 lbs
Water resistance	Excellent
Acid resistance	Excellent
Rust resistance	Excellent
