Barricade

DESCRIPTION: When applied to hard, non-porous surfaces, BARRICADE forms a protective wax barrier that resists graffiti and other stains. After initial application, BARRICADE will remove new graffiti and re-coat surfaces with barrier film in one easy step. It may be applied to metal, vinyl, formica, enamel and linoleum. Prevents staining and corrosion from urine on bathroom stalls. BARRICADE keeps food from staining smooth restaurant surfaces such as vinyl booths and plastic or varnished partitions (non-food contact). Removes hockey puck marks from Plexiglas. BARRICADE works great on vinyl bus seats, school desks, counters, washroom partitions, lockers, panels, refrigerators, table tops, golf carts, boats, etc.

ADVANTAGES: 1) Non-chlorinated. 2) Stain-resistant coating. 3) Will not harm plastic. 4) Saves time and labor costs.

AREAS OF USE: Apartments, cities, counties, office buildings, hospitals, care facilities, industrial plants, restaurants, kitchens, bathrooms, bus yards, schools, golf courses, event halls and more.
