Cdiff Tablets

DESCRIPTION: Cdiff Disinfectant Tablets are the convenient and easy way to kill C. diff and many more organisms in just 4 minutes. These powerful tablets utilize sodium troclosene as the active ingredient and are bleach free. Sodium troclosene is much more stable than sodium hypochlorite (bleach), and releases chlorine at a much slower rate which means that Cdiff Disinfectant Tablets produce a solution that maintains disinfecting power for 7 days, in a sealed container, and 24 hours in an open container vs. bleach solutions that become inactive after a day. In solution, sodium troclosene has a pH of around 6.0, this mild pH means that Cdiff™ Disinfectant Tablets will be much less aggressive on surfaces, including floor finishes, than traditional bleach products which regularly have a pH of 11+. This product is more effective, at lower doses, than Quaternary Ammonium Compounds, bleach, hydrogen peroxide, and peracetic acids. Germs cannot build up a resistance to Cdiff™ Disinfectant Tablets and the solution is not deactivated by organic matter or cloth as other disinfectants can be. Certified NSF D2.

ADVANTAGES: 1) A broad-spectrum disinfectant, virucide and mildewcide. 2) Effective in both hot and cold water. 3) Disinfects and protects against odor. 4) 2 year shelf life. 5) Ships DOT non-hazardous

AREAS OF USE: Medical offices, dental offices, clinics, day care centers, nursing homes, veterinary clinics, and more.

Effective against: C. diff, MRSA & GRSA, Staphylococcus aureus, Salmonella enterica, Klebsiella pneumonia, Canine Parvovirus, Escherichia coli 0157:H7, Feline Calicivirus, Staphylococcus epidermidis, Canine Distemper Virus, Norovirus, and Many More.

SPECIFICATIONS:

Classification	Tablet
Color	White
Odor	Characteristic
Specific Gravity	~1.0 (in water)
pH	5.5~6.5
