Nex Tape

DESCRIPTION: NEX TAPE is a revolutionary silicone repair tape designed for use wherever a tough, high temperature, permanently resilient insulation or seal is required. NEX TAPE is versatile and easy to use, with no sticky residue. Properly installed, NEX TAPE provides a permanent air tight, moisture-free seal around hoses, fittings, tubes and wire harness bundles. NEX TAPE can be used for thousands of applications, from emergency repairs to electrical wiring to waterproofing to pipe repair and many more. NEX TAPE is resistant to oil, fuel, acid, solvent, saltwater and UV rays. NEX TAPE withstands 600 psi, up to 500 F of heat, plus it insulates to 400 volts/mil (8,000 volts/20 mil). NEX TAPE is a self fusing repair tape that should be in every toolbox. Each roll is 1"x10', and stretches to 36' in application. Available in black, red, yellow and clear. Large roll is 2"x36' and is available in black only.

AREAS OF USE: Emergency radiator hose repair, water hose and pipe repair, boat rigging, coating ends of rope, corrosion protection, electrical insulation, weatherproofing electrical connections, wiring harnesses, wire bundles, sealing electrical connections, plumbing repair, emergency o-rings and seals, making emergency silicone gaskets, repairing all leaking pipes (copper, PVC, and cast iron), temporary repair on air hoses, underwater repairs, repair steam leaks on heating pipe, and much more.

DIRECTIONS FOR USE: 1) Wrap NEX TAPE around project by stretching and overlapping onto itself. Stretch at least double to ensure a good bond, for high pressure leaks stretch to maximum amount. The tighter the tape is wrapped, the quicker and stronger the bond. 2) Continue wrapping the tape around project by overlapping 50% onto itself so that 1/2 the width is covered. NEX TAPE works on either side. Additional tape can be applied over project at any time in the future.

SPECIFICATIONS:	
Classification	Silicone repair tape
Color	Black, red, yellow and clear
Odor	None
Flash point	None
Solubility in water	Nil
