Road Salt Neutralizer

DESCRIPTION: ROAD SALT NEUTRALIZER eliminates discoloring of floors and carpet. ROAD SALT NEUTRALIZER is an industrial strength rinsing compound that was developed to remove the dulling, white-chalky residue left behind by ice melting products. It neutralizes the corrosive film left behind without harming painted or finished surfaces. Simply damp mop with 1-3 ounces per gallon of water. Rinse immediately with water. To remove heavy film from equipment, dilute 6 ounces per gallon of water. Allow to act for several minutes, then rinse with clean water. To eliminate carpet stains from ice melting residue, ROAD SALT NEUTRALIZER can even be used in carpet extraction equipment.

ADVANTAGES: 1) Cuts through dull, white-chalky residue left by ice melting chemicals. 2) Helps prevent discoloring of floors and carpets. 3) Dissolves salt residue without harming painted or finished surfaces.

AREAS OF USE: Hardwood and vinyl floors, metal surfaces of equipment, ramps, rugs and carpets. Anywhere that road salt residue causes an issue.

SPECIFICATIONS:

Classification	Liquid neutralizer
Color	Colorless
Odor	Cherry
pH	2.0
Solubility in water	Complete
VOC content	0.0
