## **Fast Concrete**

**DESCRIPTION:** *FAST CONCRETE is a concrete repair polymer that cures to a concrete-like color and texture. This fast-setting epoxy putty bonds to concrete, masonry, metals, wood, glass, and even many plastics. FAST CONCRETE dries in minutes, with a full cure in only 1 hour. After final cure, FAST CONCRETE can be drilled, tapped, ground, machined, filed, or painted. FAST CONCRETE will not shrink or pull away, and contains no harsh solvents. FAST CONCRETE is quick, easy to use, economical and fool proof, with no liquid mixing or measuring required. Designed for interior or exterior use, it is resistant to water, chemicals, and temperature extremes.*

**ADVANTAGES:** *1) Base epoxy and curing agent wrapped in one tube. 2) Cures in only 1 hour. 3) Cut off only amount desired, making product very economical to use. 4) Soft putty texture makes for easy kneading. 5) No pre mixing or measuring of liquids required. 6) Non fuming formulation allows for use in any area. 7) Bonds to concrete and masonry surfaces with little preparation required. 8) Chemically resistant to hydrocarbons, halocarbons, ketones, alcohols, esters, aqueous salt solutions, diluted acid and bases.*

**AREAS OF USE:** *Patch floors, curbs, steps, mortar, brick, statues, cemetery headstones, cracks and seams. Can also be used to seal leaks and tie rod holes, or anchor bolts, screws, nails and more.*

### **SPECIFICATIONS:**

<b>Classification</b>	<b>Epoxy putty tube</b>
<b>Color</b>	<b>White- gray</b>
<b>Working life (minutes)</b>	<b>4 - 7</b>
<b>Cure time (minutes)</b>	<b>60</b>
<b>Shrinkage</b>	<b>&gt;1%</b>
<b>Dielectric strength (volts/mil)</b>	<b>300</b>
<b>Shelf life (minimum)</b>	<b>24 months @ 75° F</b>

**Certified 100% Women-Owned Small Business**

**Dedicated to Integrity • Reliability • Quality Products • Friendly Service**

**Our Products are Made in the USA and we Proudly Support Veteran Endowments**
