

## Industrial Products

### Fast Plastic

**DESCRIPTION:** FAST PLASTIC is a fast-setting epoxy putty that bonds to most major plastic types including ABS, CPVC and PVC. FAST PLASTIC dries in minutes, with a functional cure in 2-3 hours, full cure in 24 hours. After functional cure, FAST PLASTIC can be drilled, sawed, carved sanded or painted. FAST PLASTIC will not shrink or pull away, and contains no harsh solvents. FAST PLASTIC is quick, easy to use, economical and fool proof, with no liquid mixing or measuring required. Provides a quick and easy way to make small or emergency repairs. Designed for interior or exterior use, it is resistant to water, chemicals, and temperature extremes. Use FAST PLASTIC to repair vehicle trim, appliance parts, plastic downspouts and gutters, PVC furniture or any rigid or semi-flexible plastics. Will also seal leaks in ABS and PVC plastic plumbing pipes.

**ADVANTAGES:** 1) Base epoxy and curing agent wrapped in one tube. 2) Cures in 2-3 hours. 3) Cut off only amount desired, making product very economical to use. 4) Soft putty texture makes for easy kneading. 5) No pre mixing or measuring of liquids required. 6) Non fuming formulation allows for use in any area. 7) Repair and rebuild plastics with little preparation required. 8) Chemically resistant to hydrocarbons, halocarbons, ketones, alcohols, esters, aqueous salt solutions, diluted acid and bases.

**AREAS OF USE:** Cities, counties, apartment complexes, large buildings, schools, landscaping crews, any plumbing department and anywhere else that uses plastic tubing or materials. Keep in every tool box.
