

**Industrial Products**

## High Heat

**DESCRIPTION:** *Hi-Heat Paint is a flame and heat-resistant coating uniquely formulated to produce a lasting finish that is resistant to surface temperatures reaching up to 1200°F. When cured properly, this fast drying paint provides a very hard, durable finish. Offers excellent corrosion resistance as well as interior and exterior durability. Designed for use on metal surfaces where excessive heat will cause regular paint to blister and crack, such as wood stoves and barbecues. Designed specifically for use on metal surfaces subject to extreme heat. Each can covers approximately 15-20 square feet and dries to the touch in 30 minutes.*

**Areas of Use:** *May be used on all exposed metal surfaces, particularly where extreme heat resistance is required, such as engine manifolds, steam pipes, boilers, mufflers, incinerators, space heaters, outside of barbecues, fireplaces, etc.*

**Industrial Products**

*The Professionals' Choice!*

**ADVANTAGES:** *1) Provides a lasting finish that is resistant to very high surface temperatures. 2) Withstands temperatures up to 1200° F (538°C). 3) Fast drying 4) Hard, durable finish. 5) Excellent rust and corrosion resistance. 6) Indoor and outdoor use. 7) Once cured, will not chip, peel, discolor, or chalk.*

### **SPECIFICATIONS:**

<b>Classification</b>	aerosol
<b>Color</b>	varies by product
<b>Odor</b>	Ketone odor
<b>Flash point</b>	<0° F (-18° C)
<b>Flammability</b>	flammable gas
<b>Solubility in water</b>	N/A
