

Automatic Feeding unit ensures a continuous supply of Bac-Aide Ultra

The Bac-Aide Ultra Drain Maintenance System provides a highly effective, non-toxic, biodegradable, bacterial grease-digesting treatment. Bac-Aide Ultra puts to work billions of colony-forming bacteria from our Industrial Drain Maintainer, which digests fats, oil and grease (FOG), leaving behind water and inert carbon. Bac-Aide Ultra helps avoid drain back-ups and reduces build-ups in grease traps, interceptors, and sewage ejectors. Odors are neutralized at the source by reducing grease.

Effective

Bac-Aide Ultra Refills contain naturally occurring bacteria designed to treat drains on a time-metered basis, providing round the clock drain protection, odor control, and clean drains.

Our systems are used by government, educational institutions, major hotels, restaurants and casinos.

Bac-Aide Ultra goes to work right away and keeps on working, making your drains operate to specification.

Waste build-up in previously untreated pipe

Bac-Aide Ultra's unique bacteria gets to work right away, colonizing in pipes and grease traps and literally eating the fat oil and grease

Bac-Aide Ultra's billions of colony forming bacteria establish a biological grease eating barrier that helps keep pipes open and free flowing

snap-in refill

EASY

- Easy to change refills can be programmed from 30 to 90 days
- Battery operated
- Reduced costs of snaking, jetting and pumping
- Economical & user friendly

Environmentally Neutral

- No harsh chemicals
- Completely biodegradable
- Naturally occurring active ingredients
- Won't harm plumbing
