Gel Tab

DESCRIPTION: GEL TABS are a unique approach to A/C drain pan treatment. As the moisture either drips on or flows over the GEL TABS, it forms a gel, locking the GEL TAB into place. This locking action never allows the GEL TAB to move or block the drain line. GEL TAB'S uniquely designed time released formula gives a positive, long lasting and aggressive cleaning action. The GEL TAB will clean sludge and other accumulations in condensate drain pans and lines, eliminating plugged condensate drain lines and stale water odors. GEL TABS provides effective long-term control of offensive odors, organic build-up, and scale and corrosion deposits in treated systems. GEL TABS are available in three sizes, the small size for wall units, the regular size for units up to 7 ½ tons, the large for up to 15 ton units. For larger units, use multiple tablets.

ADVANTAGES: 1) Tablets lock in place to insure full treatment with no line blockages. 2) Safe in all types of systems and pans, including metal and/or fiberglass construction. 3) Unique time release formulation yields long lasting results. 4) Protects against foul odors, organic build-up and scale and corrosion deposits. 5) Each tablet provides up to 6 months treatment.

AREAS OF USE: GEL TABS are a complete product for the treatment of air conditioning drain pans, dehumidifiers, computer room equipment, coolers, refrigerated vending machines, display cases and cold storage walk-ins.

SPECIFICATIONS:

Classification	Tablet
Color	Blue (regular), Red (large)
Odor	Pleasant
Solubility in water	100%
