

**Industrial Products**

# ASAP

*ASAP is a high quality anti-seize compound that makes the removal of nuts and bolts easy, even after exposure to extremely high temperatures. Our unique applicator allows the compound to be quickly applied to threads without dripping, mess or waste. Now you can get a tough job done with clean hands. ASAP also provides outstanding protection against rust and corrosion on any type of metal, and insures easy disconnection for bolts, spark plugs, threaded fittings, and bushings. Resists damp atmospheres, steam and salt spray. Will not harden, separate or fuse to any metal surface. Reduces waste, dripping and mess. ASAP is non-flammable and waterproof. Prevents galling and seizing. Convenient to use pressure driven cans with applicator pad in Aluminum and Copper.*

**Aluminum** has a non-melting synthetic carrier that dissipates without leaving a carbon residue. It deposits a dry film of nickel and graphite to plate and protect surfaces. Excellent for use on dissimilar metals such as steel to aluminum, steel to magnesium, steel to stainless steel, steel to brass, etc. Withstands temperatures to 2100°F.

**Copper** contains no lead, graphite, or aluminum and has a synthetic, non-melting carrier. This formulation includes high concentration of pure copper flakes aided by special carriers and inhibitors. This combination will protect, lubricate, and fight corrosion while enhancing electrical conductivity. Withstands temperatures to 1800°F

*Recommended for moving parts subjected to high temperatures or extreme conditions, and connections where an anti-seize property is desired. Great for industrial machinery, construction equipment, chemical processing equipment, marine hardware, vehicle fleets, assembly lines, refineries, municipalities, conveyors, boiler rooms, compressors, turbines, heat exchangers, and much more.*

- ⇒ Nuts and bolts
- ⇒ Machine parts
- ⇒ Industrial door rollers
- ⇒ Gears
- ⇒ Hinge pins
- ⇒ Bushings
- ⇒ Casters
- ⇒ Fittings
- ⇒ Gaskets
- ⇒ Flanges
- ⇒ Keyways
- ⇒ Valves
- etc...
