

Bio Bug B Gone

BIO BUG B GONE is a water-based pesticide developed especially to control bed bugs and other insects such as cockroaches, ants, millipedes, carpet beetles, and fleas. With its residual properties, any listed insects coming into contact with a surface treated with BIO BUG B GONE will be killed for up to 30 days after application. It is third party certified for effectiveness with 100% mortality occurring within 5-10 minutes of contact, depending on life stage. BIO BUG B GONE is made only with ingredients which qualify for the 25(b) exemption in the EPA Pesticide Regulations, which is a group of naturally derived chemicals that have pesticidal qualities which exhibit very low if any toxicity in humans or animals.

Non-toxic to all mammals, items treated with BIO BUG B GONE may be used as soon as it is dry and it will not harm the environment when used as directed. Simply spray on mattresses, rugs, carpets and furnishings without needing to dispose of them due to bed-bug infestation. Dries odorless without staining. Plus, no insect immunity is created with BIO BUG B GONE as can happen with some pesticides.

Available in Quarts and Aerosol.
