Eco Seal

ECO SEAL is a uniquely formulated, environmentally friendly sealer designed for use in waterless no flush urinals and for sealing drain traps. ECO SEAL is a non-hazardous trap sealer that is lighter than water and urine, which keeps the seal in place. ECO SEAL creates a non-soluble seal of a deodorizing liquid in the trap while allowing small amounts of liquid to pass through into the drain. ECO SEAL has been compounded with a pleasant cherry fragrance to give instant and long lasting odor relief. ECO SEAL works well at solving odor problems from dried out traps, keeping them wet and odor free. Keep smelly odors at bay the easy way.

For waterless urinals simply treat each urinal with 3 ounces of product per every 1500 uses, approximately every 2 weeks depending on activity level.

Use as a safe drain trap liquid for dried out drains that will keep sewer gasses from escaping. Add about a gallon of water to the drain to prime it, then seal it with 3 ounces of ECO SEAL. Eco Seal provides long lasting results as the product will not evaporate or freeze. As long as there is no additional large amount of water entering the drain ECO SEAL will remain in place.

Great For Use In:

- ⇒ **Unused or Remote Drains**
- ⇒ **Vacant Apartments**
- ⇒ **Vacant Hotel Rooms**
- ⇒ **Shower Drains**
