Han-San

HAN-SAN is a uniquely formulated skin sanitizer. HAN-SAN instantly sanitizes hands without water or towels. HAN-SAN penetrates hard to reach areas that harbor bacteria between the fingers and around finger nails. HAN-SAN helps prevent bacterial transfer, reduces hospital acquired infections and dries in about 15 seconds without drying out the skin. HAN-SAN is not a substitute for washing hands, rather HAN-SAN should be used in conjunction with Pro-Line's full line of hand cleaners for all your hand care needs.

HAN-SAN 4 ounce, 8 ounce, and Bulk/gallon contains 60% alcohol in a gel formula that evaporates quickly, has a lemon fragrance, and a special blend of emollients to leave hands soft.

HAN SAN Q contains 70% alcohol in a gel formula that evaporates quickly and contains Aloe Vera to leave hands soft.

HAN SAN G 80% contains 80% alcohol that helps reduce bacteria on the skin that can cause disease. Less viscous formula for use in spray bottles. Spray product on hands to wet thoroughly.
