Leak B Gone

Can be used to stop leaks during a rain storm or melting of snow and ice. LEAK B GONE is an all natural compound, designed for temporary or emergency top sealing of small leaks in built up/flat top roofs. LEAK B GONE will temporarily stop the leak, until a permanent patch can be applied. Prolong the life of your roof by stopping the leak and preventing water from seeping through your insulation and causing expensive damage to interior surfaces. Simply pour approximately a 1/2 inch blanket of LEAK B GONE over the suspected area of the leak, LEAK B GONE will migrate with water into the area of the leak, swell, and stop the leak immediately. If the leak does not stop immediately, add more until it stops. LEAK B GONE can be applied through standing water if poured slowly and carefully. The handy sized reusable pail ensures easy dispensing in any weather. No mixing, tools or special training.

LEAK B GONE forms a temporary patch, a permanent patch should be applied as soon as possible. When ready to make a permanent repair, simply sweep or shovel off the LEAK B GONE remains, then perform the repair. Keep some on hand for an immediate, temporary solution to water leakage on your built up or flat roofs.

Great For Use By

- ⇒ Apartments
- ⇒ Schools
- ⇒ Institutions
- ⇒ Hospitals
- ⇒ Factories
- ⇒ Malls
- ⇒ Highrise buildings
- ⇒ And any other building with a flat roof
