Neutra Kleen

NEUTRA KLEEN is a blend of neutral Ph cleaners and surfactants chosen for their ability to attack soil and hold it in suspension, so that it can be easily washed away. This cleaner maintains floor finish without stripping away the protective coating. Cleans and restores shine - no rinsing needed.

Conventional floor cleaners use ingredients like chlorine, ammonia, alcohol, and other acidic or abrasive ingredients to dissolve dirt which can damage the floor's finish. There is no need for different kinds of floor cleaners for different floor types, NEUTRA KLEEN may be safely used to clean marble, granite, vinyl, laminate, stone, porcelain, hardwood, terrazzo, ceramic tile, bamboo, and other sealed flooring without leaving any residue.

One gallon of NEUTRA KLEEN'S concentrated formula makes up to 64 gallons of cleaning solution with no harsh chemical or heavy perfume scents. Can be used with hard or soft water on all surfaces not harmed by water. After cleaning the floors can be dry buffed and the surfaces will be brought up to a very high luster.
