Green Fire

DESCRIPTION: This advanced granular ice melter is formulated with a blend of sodium and magnesium chloride for fast performance in the toughest environments. The powerful formula works immediately to melt ice, frost and snow. GREEN FIRE is enhanced with a green color indicator for superior visibility on ice and snow, to prevent under application as well as waste. This granular ice melt dissolves snow and ice in temperatures as low as 0°F. GREEN FIRE is safe to use on concrete or asphalt, is non-caustic to skin, and can even be applied by hand for efficient use in small areas. Simply spread pellets evenly by hand or with scoop, shovel, or mechanical spreading equipment at a rate of 1/4-lb per square yard.

ADVANTAGES: 1) Works immediately to melt ice, frost, and snow. 2) Non-corrosive to concrete when used as directed. 3) Does not leave a residue on carpets and floors. 4) Generates exothermic heat to power through thick ice deposits.

Areas of Use: Driveways, walkways, stairs, parking lots, cement, concrete, asphalt, flagstone and more.

SPECIFICATIONS:

Classification	Solid
Color	Green granules
Odor	Odorless
Boiling point	2732° F
Solubility in water	soluble
