Green With Envy

DESCRIPTION: GREEN WITH ENVI is a green replacement for harsh, acid-based drain maintenance products. This safer formula dissolves uric acid crystals and other hard water build-ups that cause slow drains and odor problems. GREEN WITH ENVI is a viscous liquid that clings to the pipe walls (giving additional cleaning action) as well as accumulating in the trap. It is here in the trap that GREEN WITH ENVI dissolves the crystal build-up, thereby helping to deodorize foul smelling urinals and increasing the flow rates of the drain. GREEN WITH ENVI is non-reactive and does not generate any fumes. GREEN WITH ENVI is non-hazardous, non-corrosive, non-toxic, non-acid, non-fuming, non-flammable, non-caustic and contains no V.O.C's or phosphates. GREEN WITH ENVI is completely safe on all bathroom surfaces and plumbing fixtures, including lead, aluminum, stainless steel, copper, PVC, brass, fiberglass, glass, tile, concrete, masonry, porcelain, grout and many other surfaces.

ADVANTAGES: 1) Safely attacks uric acid crystals that build up in the drains. 2) The viscous formula also attacks other deposits that accumulate on the walls of the pipes. 3) Eliminates the source of bad odors, creating a more pleasant environment. 4) Regular use will help to maintain and maximize the drain flow rates. 5) Safe on plumbing and fixtures.

AREAS OF USE: Industrial plants, warehouses, apartment complexes, hotels, restaurants, factories, schools, day care centers, office buildings, amusement parks, churches, homeless shelters, hospitals, health resorts, golf courses, cemeteries, prisons and in any other place where restrooms exist.

SPECIFICATIONS:

Classification	Liquid
Color	Amber
Odor	Odorless
Flash point	No Data
pH	0.5 - 2.5
Solubility in water	100%
Boiling point	>= 212°F

Certified 100% Women-Owned Small Business

Dedicated to Integrity • Reliability • Quality Products • Friendly Service

Our Products are Made in the USA and we Proudly Support Veteran Endowments
