Nexgen Snow Away

DESCRIPTION: NEXGEN SNOW AWAY helps to prevent the bonding of snow and ice to pavements when used before snow falls. This pre-treatment will accelerate the action of solid ice melt products that are applied after NEXGEN SNOW AWAY. This liquid formulation can also be used on outdoor mechanical handling systems such as conveyors and elevators, as well as on walkways, rail switches and virtually all outdoor deicing applications. **ACCELERATOR:** Significantly improves the performance and longevity of solid rock salt and abrasives like sand. **APPLICATION:** 0.5 Gallons/1000 square feet. Adjust dilution depending on requirement.

ANTI-ICER/PRE-WETTER: Spray on pavement before precipitation. **APPLICATION:** 0.5 Gallons/1000 square feet. Adjust dilution depending on requirement.

DEICER: Effective deicer when applied on top of snow and ice. On glazed ice it may be necessary to score the surface in several places before applying to allow penetration. **APPLICATION:** Near 32°F on thin ice use 1.0 - 2.0 gallons/1000 square feet. Less than 10° F use 3.0 - 6.0 gallons/1000 square feet. NEXGEN SNOW AWAY is dilutable up to 3:1 depending on conditions.

ADVANTAGES: 1) Versatile, can be used for many purposes. 2) Fast and easy to use. 3) Lowers operating temperatures of solid ice melt products.

Areas of Use: Driveways, walkways, parking lots, sidewalks, outdoor elevators and more.
