

Nexgen Snow Plow Coating

Areas of Use: Shovels, loaders, throwers and truck beds.

DESCRIPTION: NEXGEN SNOW PLOW COATING deposits a hard, slippery layer of silicone on plow blades and other snow removal equipment. Snow slides off treated surfaces easier and faster, allowing more snow to be moved with less fuel and less wear on equipment. In addition, the impervious silicone layer protects metal surfaces from rust and corrosion both in use and in storage, and will not wash off when cleaned after use. Simply Spray, brush, swab or roll onto low blades and other exposed metal and painted surfaces. Equipment may be used immediately, but best results are obtained with coating is allowed to dry for 30 minutes.

ADVANTAGES: 1) Protects against rust and corrosion. 2) Reduces friction for more efficient plowing. 3) Will not wash off. 4) Leaves a hard, slippery layer of silicon on plow blades.

SPECIFICATIONS:

Classification
Color
Odor
Boiling point
Solubility in water

Liquid
Colorless
Solvent
No Data
Insoluble
