# Applause

**APPLAUSE Hand Soap is a heavy duty, industrial strength, anti-bacterial soap that has been fortified with natural walnut shell scrubbers to enhance the cleaning ability of the soap. The scrubbers have the same cleaning ability of pumice, but are completely biodegradable and will not build up in drains and pipes. APPLAUSE contains superior emollients to help soften and condition the skin as it cleans, meaning hands do not get dried out with frequent use. There are no solvents, dyes or perfumes and APPLAUSE washes away completely with no greasy residue. This industrial soap is preferred by mechanics, builders and other professionals everywhere because it cleans the toughest soils, greases, inks, paints, and almost anything else with ease. Can be used with or without water for great results every time. Easy to use, simply apply a small amount in palm and work into soils. Add water and rinse while rubbing hands together then dry. For use without water, apply a small amount in palm, work into soils, and wipe clean. APPLAUSE is a USDA Certified Biobased product.**

**Available in 2.5 L dispenser refills and 3.8 ounce squeeze top bottles.**
