Coil Clean

COIL CLEAN improves efficiency of air conditioning units as it cleans and deodorizes cooling coils in the units. COIL CLEAN's specially formulated thick foam lifts out and holds dirt and grime in suspension until rinsed or condensation washes away the soil. COIL CLEAN saves time and labor of maintenance by keeping units running cleanly and efficiently resulting in less repairs required. The inverted spray allows for easy access to all areas of the unit.

COIL CLEAN is great for evaporator coils in small air conditioners, commercial air handling equipment, HVAC cooling coils, auto air conditioners, refrigerators, freezers and other refrigeration equipment. COIL CLEAN allows you to use one product to control mold and mildew, clean, deodorize, and cut through built up grime without scrubbing.

COIL CLEAN will help open up restricted air flow due to build up in the coil surface, advance heat transfer, reduce head pressure and optimize system capacity when the condenser and evaporator coil are cleaned on a regular preventative schedule. This specialized coil cleaner helps improve indoor air quality and aids in the breakdown of cold water slime in the pan. No rinsing is required on the evaporator coil. On the condenser coil a final water rinse is required.

Great For Use By:

- ⇒ **Hotels**
- ⇒ **Motels**
- ⇒ **Commercial buildings**
- ⇒ **Apartments**
- ⇒ **Universities**
- ⇒ **Auto repair shops**
- ⇒ **RV repair shops**
- ⇒ **Refrigeration service**
- ⇒ **and more...**
