Dry N Clean

DESCRIPTION: DRY N CLEAN represents the next generation in aerosol room deodorizers. The revolutionary formulation of DRY N CLEAN contains all of the performance one might expect from a dry-type air freshener, but with a unique twist. DRY N CLEAN has excellent blooming characteristics, which is the ability of the fragrance to continue to blossom after spraying. DRY N CLEAN's ultra fine particle size, only 6 microns, creates superb suspension time with no fall out and no residues, excellent for use in textile applications. What is truly remarkable about DRY N CLEAN is that it achieves this incredibly dry spray without using any ozone depleters. DRY N CLEAN contains a premium fragrance made from nature's best botanical fragrance oils, plus two odor counteractants for maximum deodorizing power.

ADVANTAGES: 1) Dry spray eliminates wet and messy fallout. 2) Contains NO OZONE DEPLETING ingredients. 3) A new light touch actuator valve for effortless pinpoint spray control (sprays when held in an upright or inverted position). 4) Chemically neutralizes malodors instantly with industrial and/or institutional strength. 5) Quickly masks and neutralizes smoke, decay, urine, feces, solvent, vomit, cooking, animal and much more. 6) Non staining formula is safe for use on fabric and upholstery. 7) Long lasting results.

AREAS OF USE: Freshening rooms, fabric, drapes, bedspreads, carpet, auto interiors and air conditioners, garbage receptacles, in restaurants, hospitals, apartments, hotels, day care centers, nurseries, conference rooms, offices, fitness centers, animal clinics, nursing homes and anywhere else odors exist.

SPECIFICATIONS:

Classification	Aerosol deodorizer
Color	Clear spray
Odor	Linen
Aerosol flammability	Non flammable spray
Spray pattern	Fine mist
Flash point (concentrate)	0* F (T.O.C.)
Boiling point (concentrate)	125° F
Solubility in water	100%
Biodegradability	100%
