## Zinc Coat

**DESCRIPTION:** ZINC COAT is a high quality, high solids, heavy duty zinc coating designed to give superior corrosion protection for iron and steel surfaces. Protects ferrous metal from oxidation by bonding with it electrochemically. Dries quickly to a hard film containing 93% zinc dust that compares to a hot dip galvanize when applied as a 3 mil thickness. Formulated for use in presence of moisture, salts and acids. Prevents rust by galvanic action, dries to a flexible coating that bends without chipping or cracking and it will not yellow even under extreme conditions. Can be used as a protective final coating or primer wherever iron or steel will be exposed to atmospheric or corrosive conditions.

ZINC COAT is designed for iron and steel surfaces, air conditioners, truck and auto fleets, automotive bodies, agriculture equipment, fences, metal roofs, metal buildings, metal fabricators, railroad equipment and marine equipment. ZINC COAT is paintable once dry. Each can will cover 30 to 40 square feet at 1 mil thickness.

**AREAS OF USE:** Paint shops, maintenance departments, engine rebuilders, factories, bus barns, pipe yards, oil rigs, refineries and industrial plants.

### SPECIFICATIONS:

<b>Classification</b>	<b>Aerosol</b>
<b>Odor</b>	<b>Solvent</b>
<b>Evaporation rate</b>	<b>&gt;3 Fast</b>
<b>Solubility</b>	<b>Moderate</b>
<b>Flammability</b>	<b>Flammable Aerosol</b>
