Stomp

DESCRIPTION: STOMP is an EPA registered non-chlorinated wasp and hornet spray that has a very high dielectric strength of 40,100 volts for use near power lines, transformers and other areas where conductivity is a concern. This product can be used indoors in attics and other places where nests are built or outdoors on hornet, wasp and yellow jacket nests. The 15-20 foot spray range allows the user to remain a safe distance away during application. It is best to treat the nests in the evening when insects have returned to the nest. Simply spray the nest until it is soaked with the spray. Stomp's high dielectric strength of 40,100 volts is verified by ASTM test method D-877. For use in and around schools, hospitals, industrial plants, tank farms, warehouses, attics, basements and patios.

ADVANTAGES: 1) Instantly knocks down the insect on contact. 2) Quickly kills after initial knockdown. 3) Long range power stream carries effectively for up to 20 feet. 4) Non-conductive up to 40,100 volts. 5) Kills wasps, hornets, and yellow jackets. 6) May be used indoors (such as in attics where nests are built) as well as outdoors.

AREAS OF USE: Anywhere wasps, hornets and yellow jackets nest, such as under eaves and overhangs, in barns, and attics, trees, bushes, chimneys, cracks, crevices, attics, warehouses, and other areas where food items are not exposed.

SPECIFICATIONS:

Classification	Aerosol
Color	Clear liquid
Odor	Insecticidal
Flashpoint	>200°F
Spray pattern	Powerful stream
Solubility in water	Nil
