SAFE-D-SCALE

SAFE-D-SCALE is a safer alternative to harsh acid products to take care of a large variety of cleaning and maintenance problems including rust, scale, lime, calcium, water spots and more. Water spot damage is caused by minerals left behind as water evaporates from surfaces. The longer they are left on the surface the harder they are to clean and will eventually etch the surface causing permanent damage. SAFE-D-SCALE is a viscous liquid that clings to the surface to be cleaned, which increases dwell time and allows for cleaning of slanted and vertical surfaces quickly and easily, meaning upkeep is a much less difficult task. This safer acid alternative is non-fuming, non-caustic and phosphate free. SAFE-D-SCALE is safe and easy to use, yet strong enough to remove years of build-up. SAFE-D-SCALE is trusted by professionals as the safer product that works.

Available in quarts, gallons, pails and drums.

Safe-D-Scale removed Rust, Lime, and Calcium Build-up from this shower head

Safe-D-Scale removed hard water spots from this window

Great For Use On:

- ⇒ Restroom fixtures
- ⇒ Railings and door handles
- ⇒ Windows and plexi-glass
- ⇒ Concrete
- ⇒ Stainless Steel
- ⇒ Grout
- ⇒ Tile
- ⇒ Painted surfaces and more...
