

## Industrial Products

### Soy Release

Tar & Asphalt Release Agent

Product #GSR948

SOY RELEASE is an earth friendly, non-petroleum asphalt release agent. SOY RELEASE is a complex blend of methyl soyate (an all natural soybean oil ester), designed to replace diesel and/or kerosene as a release agent. The esters will not allow asphalt to stick to them, hence protecting whatever surface they are applied to. SOY RELEASE provides all the benefits of petroleum based release agents, and has no negative environmental impact. SOY RELEASE is excellent for use on all asphalt applications, and may be applied to truck beds, wands, chains, conveyors, rollers, dip buckets and shovels.

#### Areas of Use:

- Construction
- Grounds Maintenance
- Street Departments
- Road Repair Equipment
- Slurry Seal Companies
- Paving Companies
- Roofers
- Airports
- Municipalities
- Government Agencies
- any place where asphalt is being used

#### Effective Against:

- Asphalt
- Tar

#### Directions for Use:

Use as is, DO NOT DILUTE. Apply a liberal amount by spray or dip onto the surface immediately prior to use. When applied properly, the product will prevent tar and asphalt type products from sticking to contact surface.

#### Specifications:

Classification	Soy release agent
Color	Clear to amber liquid
Odor	Slight citrus
Boiling point (liquid only)	212°F
Solubility in water	Non soluble
Flammability	Very low
